

# CITY OF MILL VALLEY GREEN BUILDING GUIDE

## STANDARDS FOR NONRESIDENTIAL NEW CONSTRUCTION

These green building standards have been established to ensure that new construction in the City of Mill Valley is healthy for occupants, has limited impact on the environment, reduces demand for energy, and results in cost savings from building operation. This guide is intended to help applicants understand the green building process and requirements that apply to their project.

## GREEN BUILDING PROJECT PROCESS

### 1 PROJECT DESIGN

It is important for project owners, architects, engineers, and designers to understand the applicable state and local green building requirements prior to project design. Early consideration of these standards allows for design of buildings and systems that are compliant, energy efficient, and cost effective, and minimizes back and forth when applying for the project permit.

### 2 PLANNING APPLICATION (IF REQUIRED)

If your project is subject to planning review, be prepared to identify in your planning application what compliance methods you've selected and how you plan to meet the requirements. If you anticipate difficulties meeting the requirements outlined in the Green Building Checklist, these concerns and any requests for exemptions should be identified in your planning application.

### 3 INITIAL BUILDING PERMIT SUBMITTAL

Include the following with your initial application for a building permit:

- Completed Green Building Checklist (*page 2 of this document*)
- Completed CALGreen Checklist, with plan sheet references where applicable
- Title 24 Part 6 energy calculations demonstrating compliance with one of the energy efficiency compliance methods

### 4 FINAL INSPECTION

When the project is completed, submit finalized checklists, including a Statement of Conformance from the applicable verifier attesting to the accuracy of the assessment, with the final permit materials to the building department to have the green building hold lifted.

#### DEFINITION OF "NEW CONSTRUCTION"

Per City of Mill Valley Code Section 14.48.020, a newly constructed building (or new construction) includes the production of new or replacement building(s) and major remodels. A major remodel, per City of Mill Valley code section 14.48.030 means structural modifications or additions made to a dwelling, which are greater than 50% of either: (1) the current square footage of such dwelling; or (2) the current exterior roof structure and exterior walls of such dwelling.

# CITY OF MILL VALLEY GREEN BUILDING CHECKLIST

## STANDARDS FOR NONRESIDENTIAL NEW CONSTRUCTION

PROJECT ADDRESS: \_\_\_\_\_

APN: \_\_\_\_\_ APPLICANT NAME: \_\_\_\_\_

### 1. GREEN BUILDING

The permit application includes a completed Mill Valley CALGreen Tier 1 checklist

**VERIFICATION:** The checklist must be completed and signed off on by a qualified green building rater, such as a CALGreen Special Inspector.

### 2. ELECTRIC VEHICLE (EV) READINESS (CHOOSE ONE)

**100% EV ready**, which includes:

- Build 10% of spaces to be EV Ready and
- Build the remaining spaces to be EV Capable

**EV installed, which includes**

- Build 10% of spaces to be EV Ready, and
- Install EV Chargers in 5% of the EV Ready spaces, not less than two charging ports. Installation of EV supply equipment and chargers shall be in accordance with the *California Building Code* and the *California Electrical Code*.

**VERIFICATION:** Completion of this measure should be confirmed by the qualified green building rater selected for the completion of the CALGreen Checklist.

### 3. ENERGY EFFICIENCY AND ELECTRIFICATION (CHOOSE ONE)

*Note: all projects must comply with mandatory elements of Title 24, Part 6 (California Energy Code)*

**All Electric**, which includes:

- All-electric end uses
- No natural gas or propane appliances
- No gas meters or propane infrastructure
- Compliance with energy efficiency standards required by the State (no additional local energy efficiency requirements)

**Limited Mixed Fuel**, which includes:

- All-electric end uses, with the exception of cooking appliances and gas fireplaces.
- Prewiring for future electric or induction stove
- Compliance margin of 5%, as demonstrated on the Title 24 Energy Reports

**Mixed Fuel**, which includes:

- Natural gas and electric allowed for all appliances
- Prewiring for future electric or induction stove
- Efficiency compliance margin of 10%, as demonstrated on the Title 24 Energy Reports

**VERIFICATION:** Compliance will be verified via Title 24 Energy Reports by a HERS rater
